

Founded in 1999, U.S Stem Cell, Inc. is committed to the development of effective cell technologies to treat a variety of diseases and injuries. By harnessing the body's own healing potential, we may be able to reverse damaged tissue to normal function. We are focused on the discovery, development and commercialization of cell based therapeutics that prevent, treat or cure disease by repairing and replacing damaged or aged tissue, cells and organs and restoring their normal function. We believe that regenerative medicine / cellular therapeutics will play a large role in positively changing the natural history of diseases ultimately, we contend, lessening patient burdens as well as reducing the associated economic impact disease imposes upon modern society.

Available Position: Medical Physician

Location: Kuwait

Job Type: Full Time

Position Details: U.S. Stem Cell is currently looking for a physician interested in regenerative medicine and learning stem cell treatment protocols for patients who may benefit from our technologies. Physician will be trained on all necessary skills and procedures.
